19 aprile, ore 15:00

Sala Seminari, CNR-IPCF

Story of a scientist

Giuliana Impellizzeri

(CNR-IMM Sede di Catania Università)

Giuliana Impellizzeri, Senior Researcher at the CNR-IMM Catania (University), will join the Physics Notes on April 19th, 2023.

Each has their own story. I would like to tell my story, made of science, materials, funded projects, and people. During the seminar, I will illustrate my path in the STEM field starting from the degree in Physics to today. Since I am convinced of the role of the science as an inexhaustible engine of progress, I deal with photocatalytic nanomaterials for wastewater treatment for the well-being of the environment and society.
