### Lighting our Future

*The Impact of Optics and Photonics on a Global Economy*

**Yann Amouroux**

(Europe at OPTICA, Bristol, UK)

Optics and Photonics applications can be found in so many aspects of our daily lives, from the phone you hold in your hand to the latest news on amazing photos from the James Webb Space Telescope. The question to ask yourself is what role you will play and what are your options after university?

Come and find out in this open discussion with Optica, the scientific society that advances optics and photonics worldwide.
